Abstract	<p>In 2022 two audits have been directed by the MoP, one about data availability and one about data security. These audits resulted in several recommendations. The MoP chose to retain some of these recommendations and to implement them in a 2023-2026 workplan. This paper summarizes the recommendations and their development status. In 2024 most of the recommendations have been considered and implemented. However, a few items are still in progress or partially implemented and a few of them require the MoP and its subsidiary bodies to act on. The SC provided some advice at its 9th Meeting. The MoP may provide further advice, especially on the recommendations in relation to the amendments of CMM 02 and CMM 03, and on those that require funding.</p> <p><u>Rev1: provides updates and considers inputs from MoP.</u></p>
